

THE MARSHALL REPORT

DON'T LET THEM START OWNING THE SKYS AGAIN...

[March 31, 2021 The Marshall Report](#)

Our skys got a reprieve from the constant spraying as of July 4, 2019 when Trump announced we now “own the skys”. Yet, there was still a few white stripes blowing around. But in my area the mesh screen patterns stopped.

So now, along with the Biden Truman Show, we are watching a few dumps again. Even under the Trump administration we watched as Black Hats did some big Dew, Dew in California burning trees inside out, and strategically targeting neighborhoods to what appeared to be, a clearing out of all that was in the way of their high speed rail system they wanted. Or maybe it was just a part of the Wilderness Act in their Agenda 21, more commonly known as sustainable development for the 21st Century.

And does anyone remember Hurricane Dorian where we watched it sit over the Bahamas and destroy China's new military port and other projects? **China** had built a port on a remote island in The **Bahamas** 180 miles off the U.S. coast, that aroused suspicions as to **China's** potential **military** ambitions in the area. At the time of Dorian, the port was allegedly empty, unused, and surrounded by barbed wire. When Dorian moved away after days, it was all gone. All the while the press made fun of Trump as he held up his charts tracking it all. Then, it dispersed and came up the coast as tropical storms.

That was a huge GEO Engineering Silent War, and most didn't see it at all. Or maybe it was just divine intervention...I'm sure it was a combination of White Hats with God at the helm.

As we continue on in this silent war, we must always look at what they are really doing and not what they tell us they are and are not doing. It is well known that we have all been deceived and those who asked questions have been banned, censored, and some have even been killed for calling out the truth.

Every time a group gets angry and provokes mob mentality to attack someone with a bold idea, the angry bots come out in full force in lockstep with the fake news and those conducting the deceit behind the scenes. This is a huge red flag that what they are saying is not the truth. Why on earth would anyone be threatened by ideas that are different than main stream news unless the ideas threatened an agenda being created, inflicted and pushed onto a sleeping section of what the cabal deems as useless eaters.

So, open your eyes to all things and look at what they have patents on, along with international laws governing how to use such patents. For decades they denied such weapons existed and called those who questioned it conspiracy nuts wearing tin foil hats. Today they brag about its' abilities.

THE TRUTH SHALL SET YOU FREE!

Dianne

My neighborhood

I live 30 Miles south from
Wurtsmith Air Force Base

https://en.wikipedia.org/wiki/Wurtsmith_Air_Force_Base

This base was turned over the United States Largest
Air cargo operator for the government

Kalitta air

<http://www.kalittaair.com/>

Kalitta air buys planes from air carriers from around the world
Repairs uses them and scraps them

The are also involved with and possibly own
Evergreen International Airlines

https://en.wikipedia.org/wiki/Evergreen_International_Airlines

As public government contractor

Evergreen performed more than military and intelligence community work, also servicing other government agencies in the U.S. as well as in other nations. Its Boeing 747 Supertanker aircraft was used as an firefighting air tanker from Israel to Mexico; its unmanned systems division flew drone flights over disaster zones; NASA hired it to operate its flying infrared observatory;

I saw Some of These planes sitting on the former
Wurtsmith Air Force Base

The planes are scraped out by grinding and _____

https://en.wikipedia.org/wiki/Boeing_747

Weight 300,000 to 400,000 Empty

Reduce to powder how much atmosphere could this cover

Just another Sin

God watches his dumb creations are active in

Notice

Using Hydrocarbons from under ground for power
Is equivalent to Eating the Apple in The Garden

When God Gave Us His Sun For Power

Part 2

We live under the Cabal

We let them control us and _____ us

One case in point

The resources we have are many

Do we protect them or let others steel them

Case in point

If we do the history of intellectual property

This was one of the bases that made America

A world leader and power house in industry

over the years it has be croupted and sold out from under Us

Are advantage we had was lost

Case in point

On a patent application once submitted

The Serco PPS system is an external contractor system that processes inbound electronic images of patent applications received by Serco Inc. from the U.S. Patent and Trademark Office (USPTO). Patent applications consist of electronic applications that conform to the application requirements as defined by USPTO [.uspto.gov/sites/default/files/documents/serco-patent-processing-system-PPS-PIA_0.pdf](http://uspto.gov/sites/default/files/documents/serco-patent-processing-system-PPS-PIA_0.pdf)

Serco is a foreign corporation

Why would any body let the enemy be the first eyes on this

All the people involved in this one action committed treason

Do US Americans like to be slaves —WE ARE

Do we want to take control back—Be in control

First EYES control who will own what they see and

Have the control to steal

This is one reason we are burning oil instead of living free

In the God give garden he gracious created for us

4. **Robert G Boensch** says:

Notice

Fracking

To the old timers with us
and some younger people

Before the radial tires we now have we had bias tires
if you ever drove with bias ply tires sometimes the tread would
come loose –separate from the casing–foundation of tire
when this happened you would loose control –stability

The earth is made up of many layers
when you remove fluid from these layers they become unstable
also when you pump fluids into them they also lost there stability

We are the cause of our destruction

If we would live with integrity and respect one and another
Cherish each other and follow Gods LAW

His People could start receiving the benefits contributed
By Implementing Respect for Knowledge in intellectual property

He has Said on this rock I will build

With the rock of Knowledge will we live or fall

11. [eze33](#) says:

The Dimming Documentary was very educational and has answered a number of my suspicions. I've seen jets take off from the Marine Air Station and there is no white smoke in the exhaust. I also live within a 1.5 hour drive from Seymour Johnson Air Base – USAF. Many times I've seen their B-52 Bombers at about 30,000 Feet leave white trails crisscrossing the skies. I also live about three miles from a crop dusting outfit that many local large farmers hire to spray their crops, mainly cotton. [Sad thing about the cotton. Their flowers are purple and attract Humming Birds. After fields are sprayed, you can find several hundred dead. I used to raise Japanese Long Beans (Pole Type) and they had purple flowers like little Irises and they loved them. They would fly by close to my head and my eardrums would vibrate by their wings' humming sound. Birds are singing and bees a buzzing, Spring is here! As a farmer, I can tell the true story about the birds and bees. Seen thousands in the yellow flowers of the blooming water willows today. That's good news! They're wild ones.] Crop dusters use atomized spraying as a vapor cloud verses mist spraying via pressure regulators by pumping the water mixture in ground spraying equipment. The "vapor trails" is partly correct, as water is a dispersant, but atomized into a vapor (gaseous H₂O). Anything can be mixed into the water! The Hydrogen element of the H₂O may be fusing with the Carbon element in CO₂ emissions. What basic science I do understand is that Greenhouse films are a Hydro-carbon product. I have a small one to raise plants in. Think that may be the reason scientists call global warming the "Greenhouse Effect"? I've also noticed that I have needed to use more lime to adjust the PH of my soil over the last few years. Have a Kelway PH Tester. I also had some tomatoes go to crap last year after an unusual "acid rain". Most everything else was OK. Tomatoes are the most sensitive plants to acidic conditions. Strange, since tomatoes are acidic. Looks like mankind's governmental norm is to create a problem in order to be the savior with the fix? Part of the Cabal plan? Well, got some good news for us, but bad for them! A king of Kings is soon to come, and excuse me for my perverseness, the Lord is going to put an end to mankind's foolish crap. Knowledge is good, but seems mankind has a lack of wisdom in its applications. LOLGB+ >STAY STRONG!

Working with the soil and watching seeds grow is such a blessing. I remember when having to help break open peas...I thought it was a waste of time when you could buy a can of them for a dime. Boy did I get an education on the difference. Smile. God bless.

1. [eze33](#) says:

Amen! Praise the Lord. My favorite pea was the Pink Eye Purple Hull. It was common with the elders folk to pick some immature pods for snaps. When I started growing the Japanese Long beans (Asparagus Beans) for the local Marine Commissaries in

the post Vietnam era, oriental wives of Marines scooped them up. They were picked at 18-20 inch long before the seed developed, chopped and stir-fried with soy sauce. Good boiled as green beans too. Then my elder neighbor and dear friend asked me if she could get some 12-14 inch ones to go with the field peas for snaps. SURE, good idea! They worked GREAT! Coined a new name for a bowl of peas and snaps. > Southern Pink Eyes with Japanese Snaps. Haven't grown either in years. Simi- retired now and enjoy my new grape vines started a few years ago. Starting to feel a little like Noah when he retired after the flood. Ha! LOLGB+
